

How does Safera Airis compare with older stove guard technology?

Features	1st-gen stove guards	Airis
Detects human activity	X	✓
Does not interfere with normal cooking	X	✓
Takes readings every second	X	✓
Boil-dry detection	X	✓
No learning period necessary	X	✓
Multiple infrared sensors	X	✓
Cooking fume sensing*	X	✓
Child/vulnerable person lock available for all electric cooker types	X	✓
Activation and no-cooking warning for telecare	X	✓
Automatic configuration during installation	X	✓
Sensor wall mounting without a bracket	X	✓
Multiple colour options in box	X	✓
Auto-reset after activation (optional) with all electric cooker types	X	✓
Cooker power consumption monitoring for all electric cooker types	X	✓
Fail-safe two-way digital radio link	X	✓
On-board data collection	X	✓
Incorrect mounting notification	X	✓
Up to four connected water leak sensors	X	✓
Robust sensor design	X	✓
Replaceable sensor battery	X	✓
Reports fault conditions to BMS/telecare	X	✓
Reports water leaks to BMS/telecare	X	✓
Reports lack of cooking to BMS/telecare	X	✓
Reports high alarm count to BMS/telecare	X	✓
Protects hobs up to 900mm wide, even with a standard height extraction hood	X	✓
